Sponsorship Information

## Who are we?

We are For Inspiration and Recognition of Science and Technology (FIRST) Robotics Team 2508, *Armada Robotics*, from Stillwater Area High School in Stillwater, Minnesota. We compete in the FIRST Robotics Competition or FRC. FRC is a worldwide highschool level robotics competition that challenges not only the engineering skills of students but also their ability to work as a team, lead other students and more. Every year a new "game" is released and we are given a manual which lists constraints and how the game is scored. After this challenge is released our team brainstorms possible strategies for earning points and then we start working on our robot, from designing to building to programming it. Our team believes this opportunity should be open to anyone, so we don't charge any fees to join our club, and because of this fact, we rely solely on sponsor donations to fund our team. Our team has twenty-seven members this year and has been growing rapidly.

We participate in a competition to design, build, program, and test a robot, all within a six week time period with limited funds and resources. As a team, we work through problems that real world engineers face, such as designing, testing, and iterating designs for end-effectors, programming our creations, and managing funds with a bill-of-materials

During both "build-season", the time we are allowed to build our robot during, and "off-season", a preparation time for the upcoming season, students learn a variety of skills such as

- Mechanical design in practice
- Programming of real world control systems
- Computer Aided Design(CAD)
- Time management
- Communication and Teamwork skills

# Sponsor Tiers

To acknowledge the generosity of our sponsors we thank them every year with a gift of gratitude. All donations are tax deductible.
